

1337 coding school  
Mail central, Bâtiment B  
25000 Khouribga,  
MOROCCO

## ACADEMIC RESULTS FOR MOHAMED HADDAOUI

---

I, the undersigned Larbi EL HILALI, Managing Director of 1337 coding school located at Mail central, Bâtiment B 25000 Khouribga, Morocco, hereby certify that:

**Mohamed Haddaoui, born on February 16, 1998 in ain leuh (Morocco)**

obtained the grades detailed below as of September 07, 2024.

This certificate is delivered upon request for all legal intents and purposes.

**Selected in: June 2021**

**Curriculum started on: November 01, 2021**

**Curriculum ended on: -**

The progression of the student inside the curriculum is represented by its level, over 21.

**The current level of the student is: 14.87.**

The 42 curriculum is divided into two halves: the common core and the 42 advanced part. Once students complete the first half (the common core), they have the option to either continue their journey in the 42 advanced part, or conclude their progression and become an alumni at any point during this second part.

**The current situation of the student is: in the 42 advanced part.**

See details below.

Made in Khouribga, on September 07, 2024

## DETAILS

Here is a description of each part of the curriculum and the current position of the student:

### The Common Core

The common core of the 42 curriculum represents the minimum set of skills to be ready for a first professional experience. It provides basic and standard coding skills, as well as a fruitful range of soft skills. The delay of the CC is approximately between 1 and 2 years. The following information represent the skills developed during this part of the curriculum and the current progression of the student:

**Mohamed Haddaoui : Common core achieved at: 100%.**

Developed skills during the entire common core:

- **Algorithms & AI:** Standards algorithms on standard structures: searching, sorting, insertion, deletion, balance, on: arrays, linked lists, trees. State machine and asynchronous management.
- **Graphics:** Image management, RGB structure of an image, manipulating areas, drawing into an image, interacting with the window management system and getting user events and inputs from keyboard and mouse, programming with callbacks and event loop.
- **Group & interpersonal:** Collaboration, relationships and group management situations, including different kinds of interactions between people (friendly, tensions ...)
- **Imperative programming:** Basics of coding in C : the C syntax, variable, loops, conditional branches, functions, recursivity, instructions, calculus and expressions, comparisons operators, standard and advanced types, strings processing, structures, includes and libraries, memory allocation and release, linked lists, trees, the C standard library
- **Network & system administration:** Basics of computer networking : IP addresses, subnets, default routing, local network structure, host to host connectivity to network services; Basics of system administration : operating system installation with Linux, setting up security, access, users, storage, installing network services like mail, dns, web server, ...
- **Object-oriented programming:** Object programming principles in C++, classes, namespaces, constructors and destructors, memory management in C++, inheritance, abstraction, overloading, templates, standard C++ library types and tools
- **Rigor:** The need to fulfill administrative and technical constraints. The need for a wide and deep testing process to eliminate failure.
- **System programming:** Classic Unix system interactions : system calls, filesystem access and management, process creation, execution, management; inter-process communications : pipes and signals; device management and ioctl, terminal capabilities; network communication : TCP & UDP sockets, DNS resolution, endianness
- **Web:** The client-server architecture involved in the web, role and actions of the web server, role and actions of the web browser; The HTTP protocol; Web technologies involved : HTML, CSS, Javascript, images and videos; Backend language and framework for dynamic websites: one among php, ruby, python, go, javascript, Rails, Symfony, Django, Node, ... ; MVC model; users web services : web sessions, authentication, cookies, search, caddy, backoffice configuration, ... ; Basics of user experience, user interface, and design.

Details of each validated project in appendix 1.

## The 42 Advanced Part

The 42 Advanced offers a choice of path among various ICT specialisations: each student can select the topic(s) she/he wants to develop and improve. This part of the curriculum also contains several professional experiences (internships, part-time jobs, ...).

- Security: 2
- Web & Mobile: 1

Professional experience: 1 Internship

Details of the validated projects in appendix 2.

## APPENDIX 1

Projects covered during the common core:

Name	Estimated workload	Result	Associated skills	Validation date
Libft	70H	Pass with bonus	Rigor, Algorithms & AI, Imperative programming	November 30, 2021
ft_printf	70H	Pass	Rigor, Algorithms & AI	December 10, 2021
get_next_line	70H	Pass with bonus	Rigor, Unix, Algorithms & AI	December 21, 2021
Born2beroot	40H	Pass with bonus	Rigor, Network & system administration	January 07, 2022
minitalk	50H	Pass with bonus	Rigor, Unix	January 20, 2022
Exam Rank 02	0H	Pass		February 23, 2022
so_long	60H	Pass with bonus	Graphics, Imperative programming	February 28, 2022
push_swap	60H	Pass with bonus	Rigor, Unix, Algorithms & AI, Imperative programming	March 20, 2022
Philosophers	70H	Pass	Rigor, Unix, Imperative programming	May 26, 2022
Exam Rank 03	0H	Pass		June 02, 2022
minishell	210H	Pass	Rigor, Unix, Imperative programming	June 27, 2022
NetPractice	50H	Pass	Rigor, Network & system administration	August 04, 2022
cub3d	280H	Pass with bonus	Rigor, Algorithms & AI, Graphics, Imperative programming	September 18, 2022
CPP Module 00	22H	Pass	Rigor, Object-oriented programming, Imperative programming	October 10, 2022
CPP Module 01	12H	Pass	Rigor, Object-oriented programming, Imperative programming	October 11, 2022
CPP Module 02	12H	Pass	Rigor, Object-oriented programming, Imperative programming	October 16, 2022
CPP Module 03	12H	Pass	Rigor, Object-oriented programming, Imperative programming	October 17, 2022
CPP Module 04	12H	Pass	Rigor, Object-oriented programming, Imperative programming	October 18, 2022
CPP Module 05	25H	Pass	Rigor, Object-oriented programming, Imperative programming	October 25, 2022
CPP Module 06	25H	Pass	Rigor, Object-oriented programming, Imperative programming	October 30, 2022
CPP Module 07	25H	Pass	Rigor, Object-oriented programming, Imperative programming	November 01, 2022
CPP Module 08	25H	Pass	Rigor, Object-oriented programming, Imperative programming	November 03, 2022
Exam Rank 04	0H	Pass		December 29, 2022
Inception	210H	Pass with bonus	Rigor, Network & system administration	January 07, 2023
ft_irc	175H	Pass with bonus	Rigor, Unix, Network & system administration, Object-oriented programming	February 02, 2023
Exam Rank 05	0H	Pass		March 02, 2023

CPP Module 09	40H	Pass	Rigor, Object-oriented programming, Imperative programming	March 20, 2023
ft_transcendence	245H	Pass	Rigor, Web, Group & interpersonal	July 22, 2023
Exam Rank 06	0H	Pass		July 31, 2023

## APPENDIX 2

Projects covered during the 42 advanced:

Name	Estimated workload	Result	Associated skills	Validation date
Cybersecurity - arachnida - Web	7H	Failed	Rigor, Web, Security	April 11, 2024
Mobile - 0 - Basic of the mobile application	7H	Pass	Adaptation & creativity, Object-oriented programming, Technology integration	May 31, 2024
swifty-companion	49H	Failed	DB & Data, Adaptation & creativity, Object-oriented programming, Technology integration	June 24, 2024
Mobile - 1 - Structure and logic	7H	Pass	Adaptation & creativity, Object-oriented programming, Technology integration	June 25, 2024
ft_shield	196H	Pass with bonus	Unix, Network & system administration, Imperative programming	July 21, 2024
darkly	98H	Pass with bonus	Web, Adaptation & creativity, Security	July 31, 2024
matcha	98H	in progress	Web, DB & Data, Security	-
hypertube	196H	in progress	Web, DB & Data, Group & interpersonal	-
cloud-1	100H	in progress	Web, DB & Data, Network & system administration, Technology integration	-
[DEPRECATED] Python Module 00	24H	in progress	Rigor, Unix, Object-oriented programming	-
Mobile	63H	in progress	Rigor, Unix, Algorithms & AI	-

### Internship and professional experiences

Company name	Duration	Validation	Skills	Validation date
-				

## APPENDIX 3

Description of each covered project:

Name	Description
Libft	This project is your very first project as a student at 42. You will need to recode a few functions of the C standard library as well as some other utility functions that you will use during your whole cursus.
ft_printf	This project is pretty straightforward, you have to recode printf. You will learn what is and how to implement variadic functions. Once you validate it, you will reuse this function in your future projects.
get_next_line	May it be a file, stdin, or even later a network connection, you will always need a way to read content line by line. It is time to start working on this function, which will be essential for your future projects.
Born2beroot	This project aims to introduce you to the wonderful world of virtualization. This project involves sorting data on a stack, with a limited set of instructions, and the smallest number of moves. To make

push_swap	this happen, you will have to manipulate various sorting algorithms and choose the most appropriate solution(s) for optimized data sorting.
Exam Rank 02	This project will evaluate your abilities and knowledge about programming.
minitalk	The purpose of this project is to code a small data exchange program using UNIX signals. It is an introductory project for the bigger UNIX projects that will appear later on in the cursus.
so_long	This project is a small 2D game with minilibx. You'll learn about textures, sprites and tiles.
Philosophers	Eat, Sleep, Spaghetti, repeat. This project is about learning how threads work by precisely timing a group of philosophers on when to pick up forks and eat spaghetti without dying from hunger.
minishell	The objective of this project is for you to create a simple shell.
Exam Rank 03	
NetPractice	NetPractice is a general practical exercise to let you discover networking.
cub3d	This project is inspired by the world-famous eponymous 90's game, which was the first FPS ever. It will enable you to explore ray-casting. Your goal will be to make a dynamic view inside a maze, in which you'll have to find your way.
CPP Module 00	This first module of C++ is designed to help you understand the specificities of the language when compared to C. Time to dive into Object Oriented Programming!
CPP Module 01	This module is designed to help you understand the memory allocation, reference, pointers to members and the usage of the switch in CPP.
CPP Module 02	This module is designed to help you understand Ad-hoc polymorphism, overloads and orthodox canonical classes in CPP.
CPP Module 03	This module is designed to help you understand Inheritance in CPP.
CPP Module 04	This module is designed to help you understand Subtype polymorphism, abstract classes and interfaces in CPP.
CPP Module 05	This module is designed to help you understand Try/Catch and Exceptions in CPP.
CPP Module 06	This module is designed to help you understand the different casts in CPP.
CPP Module 07	This module is designed to help you understand Templates in CPP.
CPP Module 08	This module is designed to help you understand templated containers, iterators and algorithms in CPP.
Exam Rank 04	
Inception	This project aims to broaden your knowledge of system administration by using Docker. You will virtualize several Docker images, creating them in your new personal virtual machine.
ft_irc	Create your own IRC server in C++, fully compatible with an official client.
Exam Rank 05	
CPP Module 09	This module is designed to help you understand the containers in CPP.
ft_transcendence	Surprise
Exam Rank 06	
Mobile - 0 - Basic of the mobile application	Piscines are an important time in your cursus, during which you will have the occasion to learn a new language, or even a new paradigm!
Mobile - 1 - Structure and logic	Piscines are an important time in your cursus, during which you will have the occasion to learn a new language, or even a new paradigm!
ft_shield	Use your skills to create a daemon to create your first basic trojan.
darkly	Introductory project to computer security in the specific field of the web, this project will have you dissect a vulnerable website. In doing so, you will develop your own approach to thinking about security in a web application and become aware of issues related to simple development errors, both from a programming and a design perspective.
