Profile

I am a full stack web and mobile developer passionate about IT and new technologies. I am curious and rigorous in my approach to development, with a strong ability to adapt effectively to team work environments. I am excited to continue developing my skills and contribute to innovative projects.

Education

Baccalaureate Of Physical Sciences — Salam High School 📅 2017 – 2018

First Year Of Bachelor's In Physical Sciences — Moulay Ismail University 📅 2018 – 2019

Software Engineer Student — Mohammed VI Polytechnic University - 1337 📅 2021 – present

---

Experience

Thinkable — Software Engineer 📅 Nov 2023 – Apr 2024

Project AI-Powered Script Writing Software (PlotDot)

Angular Nest.js MongoDb GraphQl

- Developed and enhanced core components of PlotDot.
- Improved the application's performance, appearance, and usability.
- Improved the application's performance, appearance, and usability.
- Contributed to significant user interface improvements.
- Received a commendation for outstanding skills and dedication from Matt Sanders, President of Thinkable, upon completion of the internship.

Projects

FT_IRC

C++

Contributed to the development of an IRC server project, implementing server functionality, handling user connections, and ensuring seamless communication within the IRC network using C++.

FT_Transcendence

Nest.js Next.js Socket.io Tailwind CSS Typescript PostgreSQL

This project consists of creating a website for the mighty Pong contest including the user accounts, chatting in channels and playing the game pong features.

INCEPTION

Docker

This project aims to broaden our knowledge of system administration by utilizing Docker. I virtualize several Docker images, creating them on our new personal virtual machine.
